Intercept Skin Aging Where It Begins

It is never too early or too late to arrest the aging of your skin by stimulating cell renewal and repair. The synergistic combination of proactive extracts of Celergen Serum Royale retards the aging process, intervening and fighting aging where it starts; by targeting the heart of the aging process and intervening at the cellular level.

These potent extracts help prevent moisture loss and treat invisible, deep seated inflammation; repairing damage by stimulating the turnover of skin cells and boosting collagen synthesis; and maintaining the skin's healthy condition.

Discover Swiss Skin Perfection

Pamper Yourself With Our Exclusive Swiss Cellular Skincare

Developed and researched in Switzerland, Celergen Serum Royale is lavishly infused with bio active ingredients, namely specialized cell extracts from botanical plants, BotaniCells, Cellagene and Celergen's proprietary exclusive BIODNA Cellular Marine Complex and Peptide E Collagen.

This powerful rejuvenator will transform the appearance of your skin into a firmer and seemingly porcelain state.

The Ultimate Luxury For Your Skin

Celergen's Exclusive BIODNA Cellular Marine Complex

With the overwhelming success of Celergen's Advanced Swiss Marine Cell Therapy Supplement, Celergen Serum Royale also incorporates the powerful and effective BIODNA Cellular Marine Complex. This marine complex is extracted using proprietary biological DNA extraction technology which prevents the depolymerization of the active ingredients, ensuring the effectiveness of the product.

The anti-oxidant properties of the BIODNA Cellular Marine Complex nourishes and enriches our complexion, keeping it illuminated, hydrated and glowing.

Peptide E Collagen

This highly concentrated precious serum contains the exclusive Peptide E Collagen which offers the secret of cellular longevity for the most demanding skin. Day after day, your skin regains its strength, the shape of your face is gradually redefined, wrinkles and fine lines are smoothed. For even greater effectiveness, this Peptide E Collagen is specially designed to work in synergy with the BIODNA Cellular Marine Complex.

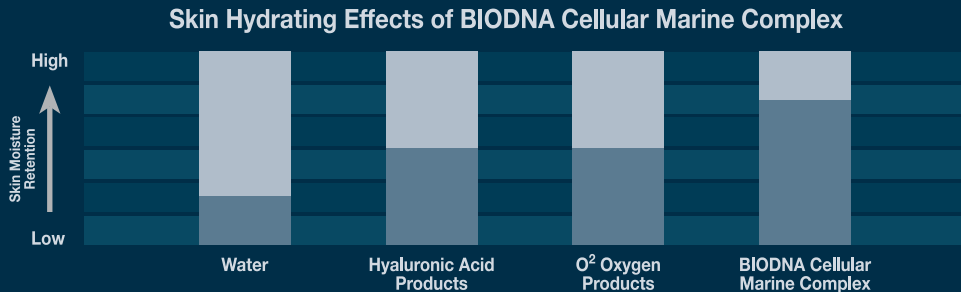

Celergen's OXYIS Cellular Process

The Power To Turn Back Time

An important binding ingredient in the OXYIS Cellular Process is OxyCell. This is a critical proprietary ingredient embedded in Celergen Serum Royale which is designed as a carrier and transport mechanism by imparting essential nutrients to the cells in our skin.

By increasing the oxygen supply to our cells during the OXYIS Cellular process, OxyCell allows our cell epidermis to absorb optimum oxygen essential for the metabolic process, calming the Chronic Silent Inflammation. It curbs the prime causes of premature aging by delivering a dose of energizing nutrients, making our skin more youthful and rejuvenated.

This fast penetrating formula, synergistically diffuses damaging agents such as free radicals, resulting in a rapid surge of hydration in our skin.

Experience Our Swiss Moisture Essentials In A Bottle

BotaniCells

Aimed specifically for boosting our cell metabolism and skin regeneration, BotaniCells, derived exclusively from botanical plant placentas and extracts work against oxidative stress and provide essential nutrients for cell growth and development.

Cellagene

Cellagene is a combination of diverse botanical and herbal active extracts, which are renowned to be some of the world's most effective natural healing substances. Cellagene also stimulates the key mechanisms of the healing process within the skin to help continuously repair wrinkles and promote tissue firmness.

Beauty Never Sleeps

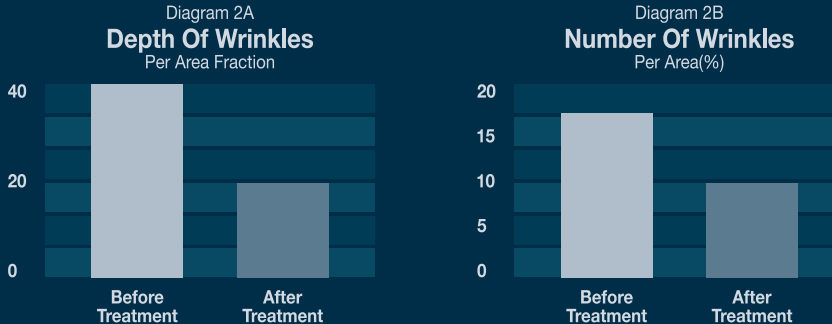

Celergen Serum Royale is clinically proven by renowned Skin Testing Institute in Switzerland.

The astonishing results experienced by our clinical subjects are manifold and they have revealed the following:

90% noticed an improvement in their skin's texture

80% reported that their skin appeared refreshed and renewed

75% noticed an improvement in the appearance of lines and wrinkles

Further clinical studies were carried out on 20 women aged 25 to 55 with the application of OxyCells twice a day for 14 days. Reduction in the depth of wrinkles and reduction in the number of wrinkles per area fraction is evident from diagram 2a and 2b.

Active Intervention at any Age with Celergen Serum Royale

30s

Begin intervening your skin by inhibiting the onset of Chronic Silent Inflammation and nourishing and energizing your skin cells.

40s

Reduce any early lines around eyes and mouth, boost collagen production and hydration, recreate glow.

50s

Slow the aging process by diminishing wrinkles, improving elasticity and rekindling luminescence.

60s

Alleviate signs of aging, maintain skin's vitality and prevent further damage.

Redefine the luxury of youth with
Celergen Advanced
Swiss Marine Cell Therapy Supplement and
Celergen Serum Royale

A perfect match to regain your Vibrant Youth.

You Will Never Look Your Age Again.
